FROM POSSIBILITY TO OPPORTUNITY

Activity / Role Play / Improv / Case Kit

WEEK 5

ACTIVITY A · OPPORTUNITY MAP RELAY

- Purpose: move from broad curiosity to specific learning actions.
- Set four signs around the room: INTERESTS, SKILLS, PATHWAYS, PEOPLE/EXPERIENCES.
- Teams rotate every 60-90 seconds and add examples. On the final rotation, each team connects one item from every category into a realistic opportunity path.
- Debrief: Which connection was obvious? Which surprised you? Which could you act on this week?

ACTIVITY B · SAME GOAL, DIFFERENT ASSETS

- Shared goal: Help a student learn whether a chosen field is a fit before committing to it.
- TEAM A assets: coach connection; local employer; volunteer event; school counselor.
- TEAM B assets: alumni contact; LinkedIn; community organization; teammate's parent.
- TEAM C assets: professor; industry association; job shadow; local business owner.
- Rule: teams may use only their assigned assets. Build a 3-step route and give a 60-second pitch.
- Observe collaboration, listening, role clarity, adaptability, and evidence behind decisions.

ACTIVITY C · OPPORTUNITY ASK SPEED ROUNDS

- Pairs face each other. Student A has 30 seconds to make an informational-conversation ask.
- Student B gives feedback: clear? specific? professional? small ask? authentic?
- Switch roles. Then change partners and repeat with one improvement.
- Challenge round: the professional says, 'I'm really busy.' Student must respond professionally without pressuring.

ACTIVITY D · FUTURE-SELF HOT SEAT

- Prompt: What is something I should start building now, while I am still an athlete, that my future self will be grateful I built?
- One student answers for 30 seconds. Peers may ask only curiosity questions — no advice.
- Rotate quickly. Close by asking students what themes repeated across the room.

CASE SCENARIO · THREE WAYS TO EXPLORE

- A student says they might want to work in sports business but knows no one in the field.
- Option 1: Search job titles for an hour and stop.
- Option 2: Ask a coach for one introduction, research the person, and request a 15-minute learning conversation.
- Option 3: Apply randomly to ten internships without learning what the roles involve.
- Teams choose the strongest next move, explain why, then improve it by adding one additional learning action.
