BUILD6™

WEEK 9 · AI at Work

Think Better. Work Smarter. Stay Human.

ACTIVITY KIT / ADD-ONS / TOOLKIT

Use these as modular add-ons. Coach Jones may run one full activity or combine short rounds. Keep students moving, speaking, deciding, practicing and retrying.

ACTIVITY 1 · Would You Trust It?

Students move to YES / NO / IT DEPENDS for AI-use scenarios and defend the conditions required before trusting the output.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- What did I notice about the difference between getting an AI answer and making a professional decision?
- AI Verification Checklist + Human/AI Project Evidence + Professional AI Rules
- Preserve one example showing how you used judgment: the original AI output, what you changed or rejected, what you verified, and why your final decision was better.

ACTIVITY 2 · Prompt Makeover Relay

Teams transform vague prompts into professional prompts with role, context, goal, audience, constraints and format.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- What did I notice about the difference between getting an AI answer and making a professional decision?
- AI Verification Checklist + Human/AI Project Evidence + Professional AI Rules
- Preserve one example showing how you used judgment: the original AI output, what you changed or rejected, what you verified, and why your final decision was better.

ACTIVITY 3 · AI Detective

Teams critique flawed AI answers for unsupported claims, privacy risks, bias, missing context and overconfidence.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- What did I notice about the difference between getting an AI answer and making a professional decision?
- AI Verification Checklist + Human/AI Project Evidence + Professional AI Rules
- Preserve one example showing how you used judgment: the original AI output, what you changed or rejected, what you verified, and why your final decision was better.

ACTIVITY 4 · Truth, Maybe, or Nope

Teams classify AI output as Trust / Verify / Reject and explain why.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- What did I notice about the difference between getting an AI answer and making a professional decision?
- AI Verification Checklist + Human/AI Project Evidence + Professional AI Rules
- Preserve one example showing how you used judgment: the original AI output, what you changed or rejected, what you verified, and why your final decision was better.

ACTIVITY 5 · Human + AI Project Studio

Students improve a real project while documenting what AI did and what they personally changed, verified and owned.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- What did I notice about the difference between getting an AI answer and making a professional decision?
- AI Verification Checklist + Human/AI Project Evidence + Professional AI Rules
- Preserve one example showing how you used judgment: the original AI output, what you changed or rejected, what you verified, and why your final decision was better.
