BUILD6™

WEEK 9 · AI at Work

Think Better. Work Smarter. Stay Human.

FACILITATOR GUIDE

Week Purpose

Use AI as a professional thinking partner while keeping human judgment, verification, privacy, ownership, and communication in the driver's seat.

Essential Question

How do I use AI without giving up my own thinking?

Skills

- Critical thinking
- Prompt design
- Verification
- Privacy & confidentiality
- Bias / hallucination awareness
- Professional judgment
- Human ownership

Weekly Rhythm

Monday · Catch-Up + Discussion

Finish missing work, check projects, and discuss where you already use AI, what you trust it for, and what still requires human judgment.

Facilitator note: Monday is primarily catch-up, accountability and discussion. Do not overload it with new instruction.

- What do I need to finish or organize?
- Where am I already using AI?
- What should I never outsource to AI?

Tuesday · Prompting + Workplace Problem-Solving Lab

Practice ROLE + CONTEXT + GOAL + AUDIENCE + CONSTRAINTS + FORMAT. Improve weak prompts and decide what the human must still own.

- Rewrite: “Help me get a job.”
- What context or constraints did you add?
- What should the human still decide?

Wednesday · AI Judgment + Verification Lab

Coach Jones leads STOP - CHECK - DECIDE, AI Detective, Fix the AI, and Trust / Verify / Reject.

Facilitator note: Run the activity exactly enough that students practice, receive feedback, and can explain what they learned.

- STOP: What do I need to understand?
- CHECK: What facts, dates, sources, assumptions, bias, privacy, or missing information must I verify?
- DECIDE: Use, revise, verify, reject, or ask a better question - and why?
- Create My AI Verification Checklist (5+ rules).

Thursday · AI Project Studio

Use AI on a real BUILD6 project. Document your prompt, output, changes, rejections, verification, and human contribution.

- What I asked
- What AI gave me
- What I changed / rejected / corrected
- What I verified and how
- What I contributed that AI could not replace

Friday · Human Advantage + Professional AI Rules

Finish work, identify what humans must still do well, and preserve a portfolio/capstone artifact.

Facilitator note: Finish missing work first, then reflection, thank-you/follow-up when appropriate, and portfolio/capstone evidence.

- My Professional AI Rules (7+)
- The human advantage I want to strengthen is ___ because ___
- What evidence from this week belongs in my portfolio/capstone?

Coach Jones - Wednesday Run of Show

1. Would You Trust It? - Students move to YES / NO / IT DEPENDS for AI-use scenarios and defend the conditions required before trusting the output.

2. Prompt Makeover Relay - Teams transform vague prompts into professional prompts with role, context, goal, audience, constraints and format.

3. AI Detective - Teams critique flawed AI answers for unsupported claims, privacy risks, bias, missing context and overconfidence.

4. Truth, Maybe, or Nope - Teams classify AI output as Trust / Verify / Reject and explain why.

Facilitator Questions

- What did you notice?
- What changed after feedback or a second attempt?
- Where would this matter in a real workplace?
- What decision did the student own instead of outsourcing?
- What evidence should be saved for portfolio or capstone?

Midweek Reflection

What did I notice about the difference between getting an AI answer and making a professional decision?

Friday Reflection

What are my rules for using AI professionally, and which human skill do I want to strengthen because AI exists?

Capstone Connection

Preserve one example showing how you used judgment: the original AI output, what you changed or rejected, what you verified, and why your final decision was better.
