BUILD6™

WEEK 11 · How a Business Actually Works

Champion Tire & Wheel - Operations. Customers. Quality. Careers.

ACTIVITY KIT / ADD-ONS / TOOLKIT

Use these as modular add-ons. Coach Jones may run one full activity or combine short rounds. Keep students moving, speaking, deciding, practicing and retrying.

ACTIVITY 1 · Customer-to-Outcome Map

Teams map a customer request through roles, handoffs, materials/information, quality, safety and final delivery.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- What part of a business system had I never thought about before, and why does it matter?
- Business Workflow Map + Champion Operations Detective + Career/Skill Map
- Preserve one operations insight that changed how you understand work: what you observed, which roles were connected, and what could happen if one handoff failed.

ACTIVITY 2 · Handoff Failure

A workflow card is removed or changed; teams identify downstream customer, time, cost and reputation effects.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- Business Workflow Map + Champion Operations Detective + Career/Skill Map
- Preserve one operations insight that changed how you understand work: what you observed, which roles were connected, and what could happen if one handoff failed.

ACTIVITY 3 · Quality / Safety Checkpoint Challenge

Teams decide where checks belong and what happens if they are skipped.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- Business Workflow Map + Champion Operations Detective + Career/Skill Map
- Preserve one operations insight that changed how you understand work: what you observed, which roles were connected, and what could happen if one handoff failed.

ACTIVITY 4 · Operations Detective

Students use a structured observation sheet during the Champion tour.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.

Evidence to Capture

- Business Workflow Map + Champion Operations Detective + Career/Skill Map
- Preserve one operations insight that changed how you understand work: what you observed, which roles were connected, and what could happen if one handoff failed.

ACTIVITY 5 · Hidden Careers Map

Students identify careers in operations, customer service, technology, finance, sales, inventory, leadership and supply chain.

Run It

- Explain the situation and success target in under 90 seconds.
- Put students into pairs or teams and assign roles when useful.
- Run the first attempt quickly - do not overcoach before students try.
- Stop and ask one observation question.
- Give one precise coaching point or introduce a curveball.
- Retry immediately.
- Debrief by connecting the activity to a real workplace, interview, project, customer, team or professional relationship.
