# BUILD6™

## WEEK 11 · How a Business Actually Works

*Champion Tire & Wheel - Operations. Customers. Quality. Careers.*

**STUDENT WORKBOOK**

**Essential Question:** How do people, process, technology, quality, safety, and customer needs connect inside a real business?

**Why this week matters:** Use a real workplace to understand operations, workflow, customer experience, quality, safety, supply chain, technology, financial impact, teamwork, and hidden career paths.

## Skills I Am Building

- Systems thinking
- Operations
- Workflow
- Quality control
- Customer experience
- Safety
- Supply chain awareness
- Business economics
- Career exploration

# MONDAY • Catch-Up + Business Systems Discussion

Finish missing work and discuss what has to happen behind the scenes for a customer to receive a finished product or service.

**What happens behind the scenes?**

____________________________________________________________

____________________________________________________________

____________________________________________________________

**Where can one mistake affect quality, money, safety or reputation?**

____________________________________________________________

____________________________________________________________

____________________________________________________________

**What jobs exist that customers may never see?**

____________________________________________________________

____________________________________________________________

____________________________________________________________

# TUESDAY • Business Systems Lab

Map a customer need from first contact to finished outcome. Identify roles, handoffs, quality checks, delays, waste, customer impact and money impact.

**Customer need**

**Workflow steps**

**Roles / responsibilities**

**Handoffs**

**Quality / safety checks**

**Where time, money or reputation can be lost**

## WEDNESDAY • Champion Research

Research products/services, customers, problems solved, likely workflow, technology, safety, careers and tour questions.

**Products/services**

**Customers and problems solved**

**My workflow hypothesis**

**Technology / safety I expect to see**

**Hidden careers I want to look for**

**Tour questions**

### Midweek Reflection

What part of a business system had I never thought about before, and why does it matter?

## THURSDAY • Operations Detective Tour

Wear closed-toe shoes. Observe one workflow, quality-control point, customer-service moment, technology use, safety practice, teamwork/leadership behavior and unexpected career.

**One workflow**

**One quality-control point**

**One customer-service moment**

**One technology use**

**One safety practice**

**One leadership/teamwork behavior**

**One unexpected career**

**One improvement question**

# FRIDAY • Operations Debrief + Thank-You

Write a thank-you, connect observations to transferable skills, and preserve a business-systems artifact.

**What surprised me?**
